- Harvest : from 4<sup>th</sup> to 21st October 2016

# Château Poujeaux

## Vintage 2016

### Climate

After a warm and dry winter, spring 2016 was fresh and exceptionally wet. Slow vegetative development has gradually accelerated. The flowering could thus be done in a homogeneous way, without stress. With a comfortable productive potential, the rather dry summer has been extended in order to offer a nice concentration and a great maturity to this exceptional and unexpected vintage.

The providential Indian summer of this year has offered us harvests of rare qualitative precision. Each terroir has been able to express its potential and aromatic complexity
